US.bilstein.com

Setting the pace for over 50 years.

BILSTEIN introduced the very first monotube gas-pressure shock absorber to the racing world over 50 years ago. It didn't take long for racers to recognize the superior performance that this new technology provided and the wins started stacking up. In fact, ever since, the world's most renowned drivers have won on BILSTEIN shock absorbers.

After 50 years of continuously evolving monotube shock technology, the winning tradition continues with victories in 2016. From Daytona to Le Mans to Baja, the legendary BILSTEIN technology can be found in winners' circles around the globe.

Every BILSTEIN shock absorber featured in this catalog is a true monotube high pressure gas shock; no emulsion, no foam cells, just performance. No matter what you race, BILSTEIN has the technology and performance you need; count on BILSTEIN to deliver the winning results you're looking for. After all, we've been the leader since the very beginning.

Why race on BILSTEIN?

1. BILSTEIN's attention to detail results in precisely engineered products that combine fit and function to deliver consistent and repeatable performance.
2. BILSTEIN offers race winning proprietary piston designs in each shock as well as a variety of piston upgrades to meet your specific needs. Combined with superior spring steel deflective disc technology, BILSTEIN's dampers deliver instant response to suspension movement and control when you need it.
3. BILSTEIN products are legendary for their durability and fade-free performance. Tight tolerances and top quality components helps deliver the same damping feel from start to finish and extends the lifespan of the shocks.
4. BILSTEIN offers an extensive line of parts to maintain and fine tune your shocks in addition to a range of new products for upgrade, including new offerings such as single and double adjustable shaft assemblies, new piston designs and solid piston band.

BILSTEIN's unique deflective disc valving system allows for exact damping of both compression and rebound movements.

BILSTEIN Q&A.

The following are some commonly asked questions and their corresponding answers concerning BILSTEIN monotube gas pressure shock absorbers:

Q. What's new with BILSTEIN?

A. We've introduced both single and double adjustable shaft assemblies that are fantastic upgrades for racer rebuildable shocks, and our new single and double adjustable remote reservoirs make a potent combination for on-car tunability. We've released three new piston designs in both 8mm and 12mm ID variants that build upon our already strong proprietary piston designs, with more in the works. We've also re-energized our 46mm steel body rebuildable offerings with the introduction of the all new base valve design for the SNS2-BV series as well as the new EM46 emulsion shock. The new XVA-30 30mm applications are making a big splash in the Quarter Midget market.

Q. Do BILSTEIN shocks fade as they are used?

A. BILSTEIN uses nitrogen pressure to stabilize the oil and eliminate fade over the life of the damper. This allows BILSTEIN to deliver the most responsive damping for ultimate control.

Q. How does BILSTEIN create damping force within the shock?

A. Damping force is created by forcing oil, while under pressure, through orifices. BILSTEIN shocks then arrange spring steel valve discs (or shims) in various diameters and thickness to tune the damping forces to the exact forces needed. Unlike other companies, BILSTEIN shims are made of Spring Steel. This material not only allow BILSTEIN shocks to have greater precision and performance, but also longevity as the discs or shims do not fatigue like other brands over time.

Q. Why is the shaft on a BILSTEIN shock always extended?

A. The BILSTEIN monotube gas shock features a nitrogen chamber that is separated from the oil by a dividing piston. The pressure applied by the nitrogen, called gas reactive force, prevents cavitation and produces superior damping response and control. BILSTEIN's low friction seals allows the force to freely extend the shaft. In some cases the gas reactive force of the shock could slightly raise the car's ride height, so a simple chassis adjustment may be needed.

Q. Does BILSTEIN offer specific applications for the various dirt and asphalt racing series?

A. Bilstein offers a variety of standard settings that have been designed and tested with years of input on all sizes and styles of tracks. If you have any questions determining what is best for your particular application, the BILSTEIN Motorsports Department will be happy to assist.

Q. How can I learn more about tuning BILSTEIN shocks?

A. Contact us about our BILSTEIN Technical Training School to learn more about assembling and tuning BILSTEIN products. Participants start with the basics of damping terminology, followed by graph reading, and then advance into hands-on assembly and disassembly of a variety of BILSTEIN shocks. Diagnostics will also be covered through dyno testing and component inspection. By the end of the training, participants will have a good understanding of tuning for track conditions and how shock choices can address handling dynamics.

MOTORSPORTS.

BILSTEIN XVA Series.

Adaptable.

XVA Series dampers are lightweight modular aluminum shock absorbers that feature a large bulb cap for maximum nitrogen capacity. The dual zone bulb helps maximize grip levels by controlling gas pressure ramp-up and optimizes travel lengths. Available in a variety of stroke lengths and levels of adjustability, these dry kits also have a base valve option for ultra low rod pressure applications.

Features & benefits:

- 6061 aluminum extruded, hard anodized threaded body supplies durability both internally and externally, maintaining tighter tolerances for superior performance
- Available with base valve technology that allows ultra low rod pressure while maintaining consistent performance
- Dual zone nitrogen chamber with large volume capacity reduces rising rates and increases grip level
- High performance rod guide seal pack that exceeds OE quality durability requirements, provides low shaft friction and withstands harsh racing environments
- Coilover spring hardware available for 2.25", 2.5" and 60mm options
- 14mm case hardened stainless steel chrome shaft that provides low seal drag/friction and resists stone chips and dings
- Billet aluminum components for precision fit and top quality, no cast parts
- Modular configuration that makes it easy for the customer to rebuild and repair
- Made in the USA

Product variants:

- 5", 6", 7", 8" and 9" stroke lengths
- Dry kits, available in linear and digressive
- Optional base valve technology

1. Adjustment Options

Available with non, single, and double adjustable shafts.

2. Spring Seat Kit

For 2.5" springs, fits non-adjustable shafts.

BILSTEIN AS2 Series.

Take on any challenge.

AS2 Series dampers are lightweight modular aluminum shock absorbers that combines optimized travel lengths and close tolerance design to create a superior design that's easy to tune and assemble. The hard anodized threaded 46mm monotube bodies are at home on pavement or dirt, and the dry kits come ready for custom tuning. Available in most popular stroke lengths and with upgradeable adjustability options to deliver unmatched control and consistency.

Features & benefits:

- 6061 aluminum extruded, hard anodized threaded body supplies durability both internally and externally, maintaining tighter tolerances for superior performance
- High performance rod guide seal pack that exceeds OE quality durability requirements, provides low shaft friction and withstands harsh racing environments
- Coilover spring hardware available for 2.25", 2.5" and 60mm options
- 14mm case hardened stainless steel chrome shaft that provides low seal drag/friction and resists stone chips and dings
- Available in non, single and double adjustable shaft configurations
- Billet aluminum components for precision fit and top quality, no cast parts
- Modular configuration that makes it easy for the customer to rebuild and repair
- Made in the USA

Product variants:

- 4", 5", 6", 7", 8" and 9" stroke lengths
- Dry kits, available in linear and digressive
- Non, single, and double adjustable variants available

1 Adjustment Options

Available with non, single, and double adjustable shafts.

2 Spring Seat Kit

For 2.5" springs, fits non-adjustable shafts.

BILSTEIN AS2-R Series.

The freedom of independence.

AS2-R Series dampers are lightweight modular aluminum shock absorbers with BILSTEIN's leading edge reservoir technology. Featuring independent high and low compression adjusters that control bleed through cage preload, this reservoir also uses a tunable base valve assembly for maximum versatility. Paired with the superior AS2 Series damper, this package is offered in common lengths with upgradeable options to meet any range of track conditions and driver preferences.

Features & benefits:

- 6061 aluminum extruded, hard anodized body and reservoir provides durability and maintains tighter tolerances
- Completely independent high and low speed adjustment. High speed control through preloaded cage for consistent adjustments and better range, and low speed control through needle and jet assembly for extra fine tunability
- 46mm base valve provides optimal flow and replenishment balance while allowing lower rod forces to be used
- Components are billet machined anodized aluminum for precision tolerance and fit
- 3-way tuning: high/low compression on reservoir and rebound on shaft
- Modular configuration for easy rebuild and repair
- Coilover spring hardware available for 2.25", 2.5" and 60mm options
- High performance rod guide seal pack that exceeds OE quality durability requirements, provides low shaft friction and withstands harsh racing environments
- Braided stainless steel dash 5 hose delivers better oil flow with less hysteresis. Banjo fittings for easier mounting
- Made in the USA

1. Adjustment Options

Available with non, single, and double adjustable shafts.

2. Spring Seat Kit

For 2.5" springs, fits non-adjustable shafts.

BILSTEIN XVA-30 Series.

Built to be the one.

Features & benefits:

- Impenetrable Rod Seal (IRS) Technology is introduced into our Rod Guide making this shock the most sealed shock in the industry. Specific tuning for stock height vehicles
- Schrader Valve design allows you to fine tune your preload. Can be filled with Shock Pump or Nitrogen
- 30mm High Purity Aluminum body for consistent, fade-free performance
- Owner rebuildable
- Pressure balanced Base Valve
- 11 Predefined valving combinations covering high banked, parking lot and dirt ovals
- Coil over kit included
- Made in the USA

Product variants:

- Standard valving options
- Dry kit

BILSTEIN EM46 Series.

You decide.

EM46 Series dampers are steel bodied modular designs that utilize emulsion technology to provide a wide range of tunable spring rate capabilities. Available in both 7" and 9" stroke variants, these dry kits feature rugged 22mm shafts and enhanced rod guide seals for premium durability. These shocks give tuners the capability to customize and fine tune spring and load rates through nitrogen pressure and oil volume.

Features & benefits:

- Utilizes emulsion technology to regulate spring rate characteristics through variation of oil and nitrogen volume for limitless tuning combinations
- Smooth zinc plated OD body design allows for optional standard and coilover applications (coilover kit B4-BOA-0000117 sold separately)
- 22mm case hardened, centerless ground chrome shaft provides optimal displacement, brute tensile strength and resists chipping and scratching
- Off-road tested 3 stage high temp rod guide seal delivers reliable and durable performance
- Optional high pressure Schrader core provided to ensure proper nitrogen pressure settings at high levels to promote consistent performance
- 1/2" graphite heims provides superior rotation with minimal restriction and fits most mounting requirements
- Monotube design maximizes heat transfer and dissipation to avoid fading and cavitation
- Made in the USA

Product variants:

- 7" and 9" stroke lengths
- Dry kits

BILSTEIN SN2 | SNS2 Series.

SNS2 Series
shown.

Survival of the fittest.

SN2 (aluminum cap) and SNS2 (steel cap) Series dampers are 46mm steel bodied, modular shock absorbers that delivers championship-worthy performance. Offered as a dry kit ready for custom tuning and assembly, they are racer rebuildable, can be easily converted to coilover use and adaptable to meet various sanctioning body requirements.

Features & benefits:

- 46mm extruded steel body with ultra smooth ID finish provides superior fitment tolerances with the large 46mm working piston design for precise fluid control
- Smooth zinc plated OD body design allows for optional standard and coilover applications (2.5" coilover kit B4-BOA-0000117 sold separately)
- 14mm case hardened stainless steel chrome shaft that provides low seal drag/friction and resists stone chips and dings
- Upgradeable to single and double adjustable shafts
- Standard with linear and digressive pistons, with optional upgrades available
- Monotube design with free floating divider piston maximizes heat transfer and dissipation to avoid fading and cavitation while delivering excellent durability
- SNS2 fill tool (B4-BOA-0001227, sold separately) allows fill plug installation for sanctioning body requirements that restrict Schrader valve assemblies
- 1/2" graphite heims provides superior rotation with minimal restriction and fits most mounting requirements
- Supplied as a dry kit (no valve stack, oil or nitrogen) to allow professional shock builders and racers the freedom to create an infinite range standard and custom valvings
- Made in the USA

Product variants:

- 5", 6", 7", 8" and 9" stroke lengths
- Dry kits, available in linear and digressive

BILSTEIN SNS2-BV Series.

Take it to the next level.

SNS2 Base Valve (BV) Series dampers are 46mm steel bodied, modular shock absorbers that feature all-new Bilstein base valve technology. The precision-balanced base valve supplies the next level in grip enhancement with enhanced tuning capabilities. Available as dry kits that are racer rebuildable and can be converted to coilover use.

Features & benefits:

- Base Valve technology allows ultra low rod pressures to eliminate gas preload and increase BILSTEIN's famous fade free performance. Provides superior grip on slick tracks and supplies "in the track" feel
- The modular SNS2-BV design allows the shock builder to easily disassemble and balance the base valve piston with the shock's working piston to produce the lowest possible gas pressure with fade-free performance
- 46mm extruded steel body with ultra smooth ID finish provides superior fitment tolerances with the large 46mm working piston design for precise fluid control
- 14mm case hardened stainless steel chrome shaft that provides low seal drag/friction and resists stone chips and dings
- Standard with linear and digressive pistons, with optional upgrades available
- Monotube design with free floating divider piston maximizes heat transfer and dissipation to avoid fading and cavitation while delivering excellent durability
- 1/2" graphite heims provides superior rotation with minimal restriction and fits most mounting requirements
- Supplied as a dry kit (no valve stack, oil or nitrogen) to allow professional shock builders and racers the freedom to create an infinite range standard and custom valvings
- Upgradeable to Big Bulb design (parts sold separately) to increase nitrogen chamber capacity to achieve ultra-low rod pressures
- Made in the USA

Product variants:

- 7" and 9" stroke lengths
- Dry kits, available in linear and digressive

BILSTEIN SZ | SL Series.

Outlast the competition.

SZ (digressive) and SL (linear) Series dampers are 46mm steel monotube shock absorbers with versatile usage in many forms of racing. Available in a range of valving options and stroke lengths, these shocks are ideal for applications where racer-rebuildability is not required or allowed.

Features & benefits:

- Monotube Shock technology dissipates heat for consistent, fade-free performance
- 46mm working piston distributes damping loads over a large area for precise spring control
- Nitrogen gas charge behind a free floating divider piston prevents oil cavitation that creates inconsistency and fading in other shock designs
- Proprietary spring steel valving discs provide superior damping during high frequency spring oscillations. BILSTEIN's spring steel, high metal memory valve discs also outlast all other brands, require far less maintenance, and eliminates the gradual degradation of shock performance commonly seen in the race shock industry. Spring steel valve discs helps your car have more entry speed, more corner speed, greater exit speed, and lower lap times; consistently
- Monotube design, along with smooth flowing BILSTEIN pistons, and correct gas charge vs damping force minimizes the traction robbing phenomenon of hysteresis
- Plated body for corrosion resistance, extra durability, and superior heat dissipation
- Sturdy steel body for durability that keeps you winning
- Available with digressive valving as an SZ and linear valving as an SL, this BILSTEIN series of shocks delivers the specific valving requirements you need for each corner of your race car

Product variants:

- 5", 6", 7" 8" and 9" stroke lengths
- Standard valving options in linear and digressive
- Dry kits available

BILSTEIN SG Series.

Compact consistency.

SG Series dampers are small body 36mm steel monotube shock absorbers designed to deliver high quality and consistent performance in a compact package. Available in two stroke lengths and a variety of valvings, these shocks work great with lightweight race applications.

Features & benefits:

- Monotube Shock technology dissipates heat for consistent, fade-free performance in a lightweight small body design
- 36mm working piston distributes damping loads over a large area for precise spring control
- Nitrogen gas charge behind a free floating divider piston prevents oil cavitation that creates inconsistency and fading in other shock designs
- Proprietary spring steel valving discs provide superior damping during high frequency spring oscillations. BILSTEIN's spring steel, high metal memory valve discs also outlast all other brands, require far less maintenance, and eliminates the gradual degradation of shock performance commonly seen in the race shock industry. Spring steel valve discs helps your car have more entry speed, more corner speed, greater exit speed, and lower lap times
- Monotube design, along with smooth flowing BILSTEIN pistons, and correct gas charge vs damping force minimizes the traction robbing phenomenon of hysteresis. Available in linear and digressive setups with variable standard valving
- Nitrogen gas charge behind a free floating divider piston prevents cavitation that creates inconsistency and fading in other shock designs
- Sturdy steel body for durability that keeps you winning

Product variants:

- 6" and 7" stroke lengths
- Standard valving options

BILSTEIN AK Series.

Don't sacrifice.

AK Series dampers are designed to provide true race performance in stock-mount configurations. Available in most common chassis configurations, these dampers also provide race-winning handling and stability through race-specific tuning and BILSTEIN's industry leading fade-free performance.

Features & benefits:

- Monotube Shock technology dissipates heat for consistent, fade-free performance
- Direct fit (OE) mounting design keeps you legal at tracks requiring stock mount shocks without giving up premium, world class shock performance
- Nitrogen gas charge behind a free floating divider piston prevents cavitation that creates inconsistency and fading in other shock designs
- Proprietary spring steel valving discs provide superior damping during high frequency spring oscillations. BILSTEIN's spring steel, high metal memory valve discs also outlast all other brands, require far less maintenance, and eliminates the gradual degradation commonly seen in the race shock industry. Spring steel valve discs helps your car have more entry speed, more corner speed, greater exit speed, and lower lap times
- Monotube design, along with smooth flowing BILSTEIN pistons, and correct gas charge vs damping force, minimizes the traction robbing phenomenon of hysteresis
- Nitrogen gas charge behind a free floating divider piston prevents the oil cavitation that creates inconsistency and fading in other shock designs
- Superior rod guide seal design and sturdy steel body create the famous BILSTEIN durability that minimizes shock failure and keeps you winning

Product variants:

- Multiple vehicle applications
- Multiple standard valving options on GM metric chassis

BILSTEIN CLUBSPORT®.

Out of love for motorsports and for the road.

The BILSTEIN Clubsport suspension kit takes our motorsport know-how and transfers it 1:1 to the open road. Our coilover suspension system with parts certificate and high-performance BILSTEIN monotube technology meet the most exacting of demands.

Features & benefits:

- Separate configuration of rebound and bump
- 100 setting variations that can be experienced and manually selected with tangible differences
- Aluminum adjusters with clearly visible and easy-to-read scale from 1 (soft) to 10 (hard)
- Positive engagement and color-coding: red for rebound, blue for bump
- Simple set-up changes in situ without additional tools
- Camber adjustment with aluminum uniball support bearings for optimum cornering stability
- Weight and installation space advantages thanks to integrated reservoir
- Extremely resilient design with quality sport springs made of high-strength material and disc springs and lock nuts made of a special aluminum alloy
- Highest force closure by BILSTEIN monotube gas-pressure technology from the field of motorsports: "Made in Germany"
- Basis for further customization for use in racing
- Parts certificate

Product variants:

- Application specific fitments

BILSTEIN MDS.

The complete package.

MDS Series dampers are dynamic range of modular shock and strut assemblies that are developed and tuned for specific road race applications. Professionally tuned and track tested for the ultimate handling package, these application-specific dampers feature independent double adjustable technology and ride height adjustability.

Features & benefits:

- Independent compression and rebound adjustment system delivers 100 setting combinations with measurable changes for precise tuning to track conditions
- In-line damping configuration offers a compact, lightweight package that does not require an external reservoir
- Each application is uniquely designed for proper chassis fitment and specifically tuned to meet the needs of professional racing. Use of 36mm and 46mm technology to match individual damping and fitment requirements
- Also available in strut applications that feature inverted 36mm monotube technology with threaded body housings for ride height adjustability
- Ultra low friction rod guide with redundant seal pack provides maximum performance and durability
- The Easy Clip System (ECS) spring retainer allows rapid spring changes and setups with zero preload
- Threaded bump stop cap integrates additional strength and protects the threaded body
- 14mm case hardened stainless steel chrome shaft that provides low seal drag/friction and resists stone chips and dings
- Billet aluminum components for precision fit and top quality, no cast parts

Product variants:

- Application specific fitments

TOOLS.

DAMPER VICE ASSEMBLY
(E4-MTL-0004A00)

The BILSTEIN Damper Vice Assembly is a task-specific vice created to properly and securely hold damper assemblies during service.

46MM TUBE PLUG
(E4-MTL-0006A00)

The BILSTEIN 46mm Tube Plug is designed to prevent possible damper tube damage during installation and removal of the end cap.

ROD GUIDE REMOVAL PLATE
(E4-MTL-0002A00)

The BILSTEIN Rod Guide Removal Plate makes removing rod guides from take-apart and racer-rebuildable shocks faster and easier.

MULTI-WRENCH
(E4-MTL-0008A00)

The BILSTEIN Multi-Wrench combines four common tools used for the assembly and disassembly of customer-rebuildable dampers into a single unit.

ROD GUIDE INSERT TOOL
(E4-MTL-0009A00)

The BILSTEIN Rod Guide Insert Tool is an extension tool that provides a safe method of installing/seating rod guide assemblies during damper service.

SPHERICAL BEARING INSERT TOOL
(E4-MTL-0003A00)

The BILSTEIN Spherical Bearing Insert Tool properly aligns the spherical bearing (heim) and eyelet for easier bearing installation.

NITROGEN FILL TOOL ASSEMBLY
(E4-MTL-0005A00)

The BILSTEIN Nitrogen Fill Tool Assembly is a compact assembly used for charging customer-serviceable and take-apart dampers with nitrogen during servicing.

PISTONS.

46mm High Flow Linear Piston.

Features & benefits:

- Symmetrical triple orifice facing with large port area improves response sensitivity
- Radiused bleed orifice area allows incremental changes through the use of different OD cover shims (without additional drilling)
- Sharp edged port machining ensures precise flow and consistent, repeatable performance between pistons
- Lightweight billet aluminum with hard anodized surface increases durability
- Flat surface (no dish) allows for zero preload on the shims but allows the use of ring shims to set preload
- Grooved for optional energizing o-ring for premium and consistent piston band sealing
- Functions with both standard cut piston band and solid band designs

Product variants:

- 8mm ID for non-adjustable shafts
- 12mm ID for adjustable shafts

46mm Digressive/Linear Piston.

Features & benefits:

- Linear face and digressive COB check valve design
- Patented digressive check valve design allows large low speed damping forces while avoiding larger high speed damping forces and allows up to 1.5mm of preload
- Radiused bleed orifice area (linear face) allows incremental changes through the use of different OD cover shims (without additional drilling)
- Maximized linear port area provides improved response sensitivity and flat surface (no dish) allows for zero preload but allows use of ring shims to set preload
- Lightweight billet aluminum with hard anodized surface increases durability
- Grooved for optional energizing o-ring for premium and consistent piston band sealing
- Functions with both standard cut piston band and solid band designs

Product variants:

- 8mm ID for non-adjustable shafts
- 12mm ID for adjustable shafts

46mm Two Port Linear Piston.

Features & benefits:

- Symmetrical dual port design that utilizes a folding disc technique which creates a distinct driver feel
- Radiused bleed orifice area allows incremental changes through the use of different OD cover shims and doesn't require additional drilling
- Sharp edged port machining ensures precise flow and consistent, repeatable performance between pistons
- Lightweight billet aluminum with hard anodized surface increases durability
- Flat surface (no dish) allows for zero preload on the shims but allows the use of ring shims to set preload
- Grooved for optional energizing o-ring for premium and consistent piston band sealing
- Functions with both standard cut piston band and solid band designs

Product variants:

- 8mm ID for non-adjustable shafts
- 12mm ID for adjustable shafts

46mm Linear Piston.

Features & benefits:

- 6 compression ports and 3 rebound ports supply a wide range of damping curves from mild to extreme forces
- Sintered steel piston remains consistent through the operating temperature range
- Flat surface (no dish) allows for zero preload on the shims but allows the use of ring shims to set preload if desired
- Functions with both standard cut piston band and solid band designs

Product variants:

- 8mm ID for non-adjustable shafts
- 12mm ID for adjustable shafts

46mm Digressive COB Piston.

Features & benefits:

- Patented digressive check valve design allows large low speed damping forces while avoiding larger high speed damping forces
- Sintered steel piston remains consistent through the operating temperature range
- COB (compression only bypass) function allows the compression bleed to be controlled independently from rebound bleed
- Functions with both standard cut piston band and solid band designs

Product variants:

- 8mm ID for non-adjustable shafts
- 12mm ID for adjustable shafts

Solid 46mm Piston Band.

Features & benefits:

- Designed for all BILSTEIN 46mm shocks and pistons
- Can be used with optional backing o-ring (on select piston designs) to create positive engagement for even greater sealing efficiency
- Teflon lined to reduce friction, increase durability and improve sealing
- Available in standard (8mm) or narrow (7.5mm) height that enhances high frequency characteristics for added grip on slick tracks

Product variants:

- Standard 8mm height
- Narrow 7.5mm height

PROFESSIONAL OFF-ROAD RACING.

BILSTEIN B8 8125.

For the off-road enthusiast.

The ideal shock absorber for custom coilover applications that demand competition-level performance. Featuring the highest quality machined components, BILSTEIN B8 8125 shock absorbers provide durability, strength and performance in the harshest environments.

Features & benefits:

- Available in 46mm and 60mm monotubes for consistent, fade-free performance
- Threaded body with dual-rate coilover hardware
- Remote reservoir for greater resistance to heat and increased travel length
- High temperature seal extends life of shock
- 22mm case hardened piston rod provides brute tensile strength while resisting sand blasting and rock chipping
- Zinc plated for resistance to off-road elements
- High temperature, size -8 hose
- All components are billet machined; no cast parts
- Industry standard $\frac{5}{8}$ " bearing
- Owner rebuildable
- Made in the USA

Shock travel:

5-16in

BILSTEIN B8 8125 uses industry standard coilover springs

- 46mm shock uses a 2.5" ID coilover spring
- 60mm shock uses a 3.0" ID coilover spring

● PROFESSIONAL

BILSTEIN M 9200 (Bypass).

Performance dialed in.

BILSTEIN M 9200 (Bypass) shock absorbers are position sensitive and adjustable, offering 6 zones of damping control and 4 external adjusters: 2 rebound and 2 compression. Utilizing an externally adjustable bypass shock absorber is the easiest and most effective way to tune your off-road suspension for ultimate performance.

Features & benefits:

- 60mm¹ and 70mm¹ monotube designs for consistent, fade-free performance
- 4 and 3 tube, position sensitive with adjustable rebound and compression
- Multiple stroke lengths available ranging from 8" to 18"
- 60mm¹ piggy back or remote reservoir
- Case hardened, centerless ground piston rod
- All machine billet aluminum components
- $\frac{5}{8}$ " stainless uniball mounts with $\frac{1}{2}$ " step spacers
- 3 stage high-temp seal
- Red synthetic high-temp racing oil
- Zinc plated
- Owner rebuildable
- Made in the USA

Shock travel:

8-18in

¹BILSTEIN measures shock size by piston diameter. Outer body diameter is the industry standard measurement for off-road shocks.

BILSTEIN Piston Diameter	Outer Body Diameter
60mm	2.65"
70mm	3.0"

BILSTEIN M 9200 (Coilover).

Created to compete.

Developed for professional off-road racing. The superior design of BILSTEIN M 9200 (Coilover) is comprised of aerospace-class materials and engineered to the tightest tolerances. Available in multiple lengths and valvings for a wide range of custom race applications.

Features & benefits:

- Available in 46mm¹ and 60mm¹ monotubes
- Threaded body with dual rate coilover hardware
- Multiple stroke lengths available ranging from 8" to 16"
- Case hardened, centerless ground 22mm piston rod
- Machine billet aluminum components
- $\frac{5}{8}$ " uniball mounts with $\frac{1}{2}$ " step spacers
- 60mm remote reservoir
- 3 stage high-temp seal
- Red synthetic high-temp racing oil
- Zinc plated
- Multiple valvings available
- Owner rebuildable
- Made in the USA

BILSTEIN M 9200 (Coilover) uses industry standard coilover springs

- 46mm¹ shock uses a 2.5" ID coilover spring
- 60mm¹ shock uses a 3.0" ID coilover spring

Shock travel:

8-16in

¹BILSTEIN measures shock size by piston diameter. Outer body diameter is the industry standard measurement for off-road shocks.

BILSTEIN Piston Diameter	Outer Body Diameter
46mm	2.0"
60mm	2.65"

ROD GUIDES			
E4-LB1-Z015A00	BEARING: DU, .866 DIA.(22MM) SHAFT	B8 8125, M 9100, M 9200	\$2.00
E4-FU2-Z046A00	ROD GUIDE: 46MM (2.0) .866" (22MM) DIA. SHAFT	B8 8125, M 9100, M 9200	\$30.00
E4-FU2-Z047A00	ROD GUIDE: 60MM (2.65) .866 (22MM) DIA. SHAFT	B8 8125, M 9100, M 9200	\$35.00
B4-VS3-Z008A00	ROD GUIDE: 46MM (2.0) .866 (22MM) DIA. SHAFT COMPLETE WITH SEALS AND O-RING	B8 8125, M 9100, M 9200	\$65.00
B4-VS3-Z009A00	ROD GUIDE: 60MM (2.65) .866 (22MM) DIA SHAFT COMPLETE WITH SEALS AND O-RING	B8 8125, M 9100, M 9200	\$75.00
O-RINGS AND SEALS			
B4-KTO-Y005A00	SEAL KIT: 2.0 C/O AND SMOOTH BODY	M 9100,M 9200	\$20.00
B4-KTO-Z024A01	SEAL KIT: 2.5 C/O AND SMOOTH BODY	B8 8125, M 9100, M 9200	\$32.40
B4-KTO-Z023A01	SEAL KIT: 2.0 COILOVER	B8 8125	\$32.40
B4-KTO-Y001A00	SEAL KIT: 1.25 DIA. SHAFT, BUMPSTOP	M 9100	\$22.00
194432	SHAFT SEAL: .866" (22MM) DIA. SHAFT, URETHANE	B8 8125, M 9100, M 9200	\$4.00
E4-B36-364	SHAFT SEAL: .866" (22MM) DIA. SHAFT, STEP W/ O-RING	B8 8125, M 9100, M 9200	\$6.00
E4-BOA-0000429	SHAFT SEAL: 1.25 DIA. SHAFT, BUMPSTOP	M 9100	\$4.50
194044	WIPER: .866" (22MM) DIA. SHAFT, URETHANE	B8 8125, M 9100, M 9200	\$4.00
E4-BOA-0000428	WIPER: 1.25" DIA SHAFT, BUMPSTOP	M 9100	\$4.00
E4-BOA-0000450	O-RING: VITON, RESERVOIR FLOATING PISTON (IFP)	B8 8125, M 9100, M 9200	\$5.00
E4-D16-Z026A00	O-RING: 2.0 ROD GUIDE	B8 8125, M 9100, M 9200	\$1.35
1000406	O-RING: 2.65 ROD GUIDE AND RESERVOIR END CAP	B8 8125, M 9100, M 9200	\$1.00
1000412	O-RING: BYPASS NEEDLE (2 REQUIRED)	M 9100	\$1.00
1000415	O-RING: BYPASS HOUSING	M 9100	\$1.00
1000430	O-RING: SQUARE CUT, 2.5 WORKING PISTON	M 9100	\$5.00
BYPASS COMPONENTS			
E4-BOA-0001104	ADJUSTER NEEDLE	M 9100	\$18.00
1001017	ADJUSTER SCREW	M 9100	\$1.00
E4-BOA-0001108	HOUSING	M 9100	\$30.00
25FNFJS	JAM NUT	M 9100	\$1.00
E4-BOA-0000258	PISTON	M 9100	\$14.00
1000520	SPRING	M 9100	\$3.00
SPRING HARDWARE			
E4-FT3-Z049A00	HAT: 46MM (2.0) LOWER SPRING RETAINER, 2.50" ID SPRING	B8 8125, M 9200	\$30.00
E4-FT3-Z050A00	HAT: 60MM (2.5) LOWER SPRING RETAINER, 3.00" ID SPRING	B8 8125, M 9200	\$45.00
E4-FT4-Z042A00	SEAT: 46MM (2.0) THREADED UPPER PRELOAD 2.50" ID SPRING	B8 8125, M 9200	\$30.00
E4-FT4-Z043A00	SEAT: 46MM (2.65) THREADED UPPER PRELOAD 3.00" ID SPRING	B8 8125, M 9200	\$35.00
E4-FT4-Z044A00	STOP RING: 46MM (2.0) SHOCK	B8 8125, M 9200	\$12.00
E4-FT4-Z045A00	STOP RING: 60MM (2.65) SHOCK	B8 8125, M 9200	\$12.00
E4-R01-Z151A00	SLIDER: 2.0 SHOCK, 2.5" ID SPRING	B8 8125, M 9100, M 9200	\$25.00
E4-R01-Z152A00	SLIDER: 2.65 SHOCK, 3.0" ID SPRING	B8 8125, M 9100, M 9200	\$30.00
E4-BOA-0000390	HAT: 2.0 LOWER SPRING RETAINER, 2.50" ID SPRING (FLAT)	M 9100	\$30.00
E4-BOA-0000346	HAT: 2.0 LOWER SPRING RETAINER, 2.50" ID SPRING (TAPERED)	M 9100	\$30.00
E4-BOA-0000177	HAT: 2.65 LOWER SPRING RETAINER, 3.00" ID SPRING	M 9100	\$45.00
B4-KT1-Z226A00	KIT: SPRING HARDWARE, 2.0 SHOCK, USE WITH 2.50" ID SPRINGS	M 9100	\$130.00
B4-KT1-Z225A00	KIT: SPRING HARDWARE, 2.5 SHOCK, USE WITH 3.00" ID SPRINGS	M 9100	\$165.00
E4-FT4-Z003A05	LOCK RING: 2.0 SHOCK	M 9100	\$15.00
E4-BOA-0000178	LOCK RING: 2.65 SHOCK	M 9100	\$30.00
E4-BOA-0000537	PRELOAD RING: 2.0 SHOCK, 2.50" ID SPRING	M 9100	\$30.00
E4-BOA-0000175	PRELOAD RING: 2.5 SHOCK, 3.00" ID SPRING	M 9100	\$35.00
E4-BOA-0000339	STOP RING: 2.0 SHOCK, 2.50" ID SPRING	M 9100	\$12.00
E4-BOA-0000183	STOP RING: 2.65 SHOCK, 3.00" ID SPRING	M 9100	\$12.00
MISCELLANEOUS HARDWARE			
E4-AP2-Z133A00	BUMP STOP: SHAFT 46mm(2.0) SHOCK	B8 8125, M 9200	\$6.50
E4-AP2-Z075A03	BUMP STOP: SHAFT 60mm(2.65) SHOCK	B8 8125, M 9200	\$6.50
E4-R03-Z111A01	INTERNAL SPACER: .400 LONG	B8 8125, M 9200	\$6.00
9244B	MOUNT: URTHANE, RESERVOIR	B8 8125, M 9200	\$5.00
E4-XK1-Z060A00	CONTACT PAD: DELRIN, BUMPSTOP	M 9100	\$15.00
5264051	HOSE CLAMP: #56 STAINLESS	B8 8125, M 9100, M 9200	\$2.00
E4-BOA-0000342	MOUNT: RUBBER RESERVOIR	M 9100	\$2.00
E4-MU1-Z015A00	NUT: 12 X 1.00mm PISTON	B8 8125, M 9100, M 9200	\$1.00
E4-XD1-Z084A00	RECEIVER: CONTACT PAD HOLDER	M 9100	\$20.00
2522880	RETAINING RING: 2.0 EXTERNAL, BUMPSTOP	M 9100	\$1.05
E4-B46-26	RETAINING RING: 2.0 INTERNAL	B8 8125, M 9100, M 9200	\$0.75
E4-BOA-0000130	RETAINING RING: 2.65 INTERNAL	B8 8125, M 9100, M 9200	\$1.00
1000932	ROLL PIN: CONTACT PAD ASSEMBLY	M 9100	\$1.00
E4-BOA-0000435	SPRING: INTERNAL BUMPSTOP, NEGATIVE	M 9100	\$10.00
OIL			
194131	OIL: GALLON BILSTEIN HIGH TEMP RACE		\$33.00
1001144	OIL: GALLON SYNTHETIC HIGH TEMP RACE		\$65.00
VALVING KIT			
B4-BOA-0001224	VALVE DISC KIT: 46MM /60MM /70MM		\$295.00

Motorsports disclaimer.

With the purchase of BILSTEIN motorsport components, you have received a product representing the best in German design and engineering. You can be sure that this product has been developed and produced with the greatest possible care, and that top quality materials have been used. Continuous manufacturing controls and inspections of supplier components are standard in our company. This is how we, as a manufacturer of suspension components, comply with ISO9001.

Motorsport products are for off-highway use only, and not subject to any corrosion or endurance testing at all. They are designed specifically for use in motorsport, and have been greatly optimized for weight.

Even on the basis of the varied use in all areas of motorsport, it is not possible to make any binding predictions or warranties on the durability of motorsport products. For this reason, EXCEPT AS OTHERWISE PROVIDED, IN SUCH WARRANTIES, ALL MOTOSPORT PRODUCTS ARE SOLD "AS IS, WITH ALL FAULTS." ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, DESCRIPTION OR QUALITY NOT EXPRESSLY SET FORTH HEREIN, ARE HEREBY EXCLUDED TO THE EXTENT PERMITTED BY LAW.

In order to prevent physical injury or material damage with serious consequences, you must observe the following:

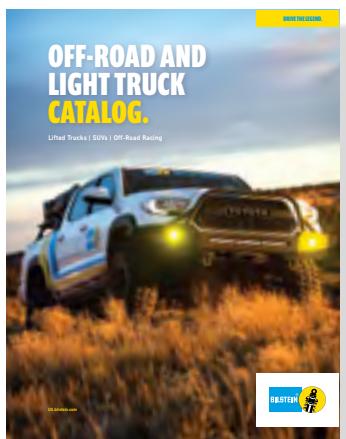

Never under any circumstances adapt or modify motorsport products. Depending on the intended purpose or the level of stress, always test motorsport products before and after every use!!!! Springs and shock absorbers may become damaged after frequent driving over rough terrain such as curbs, rocky surfaces and especially during rallying.

After collisions or accidents, please immediately check suspension or axle components for damage. If parts are defective or can no longer be used, replace them immediately with new parts which are in perfect

condition. Only in this way is it possible to ensure proper functioning of the systems. If you are not sure that proper functioning is occurring, send the affected parts for testing to BILSTEIN or to suitably equipped companies. In order to prevent contact corrosion, we advise that when cleaning suspension components the use of aggressive cleaning agents and high pressure cleaners is avoided.

Failure to comply with these instructions can result in severe material damage and/or physical injury.

BILSTEIN Motorsport parts are not TÜV approved and are designed for Off-highway use only. BILSTEIN disclaims any and all liability for unintended use of Motorsport products.

To see our full off-road product range, please download the BILSTEIN Off-Road and Light Truck Catalog.
