# Dynatech®

**WHO WE ARE** Dynatech® continues to be the exhaust leader in all forms of racing and high performance applications. Advances in racing, engineering, and design have automakers bringing a whole new breed of cars and trucks to the streets and tracks. This same excitement and new wave of technology is apparent at Dynatech® as you view the pages of our latest catalog. We continue to be focused on new products and award-winning designs.

## WORLD CLASS DESIGN & ENGINEERING

Virtual reality exhaust design systems allow engineers to design the exhaust system in virtual space that will meet all necessary design criteria. Key interference and mounting points are captured and then transferred into engineering computer stations. Tube routings, lengths, and diameters can all be manipulated for proper fit and function. These processes cut design time by 90% and produce a much more efficient and powerful design.

## TECHNOLOGY & MANUFACTURING

At Dynatech®, we strive for 100% perfection on all of the products that we manufacture. Everything we manufacture goes through proven assembly steps and procedures to provide the end user with a product that we stake our reputation on. We have instituted numerous fitment and quality control inspections. All high performance systems are 100% tested to be leak free and 100% jig tested for fitment.

## UNMATCHED SALES & CUSTOMER SERVICE

Our team members are more than welders, machinists, engineers and salespeople. We are racers and enthusiasts just like you. We understand the needs of our customers and respond accordingly with outstanding technical support and customer service. In some cases, the very people that build the product speak with the end user. Fast and friendly service before, during and after the sale all come standard when you purchase Dynatech® products.

## 2020 DYNATECH® CATALOG

★★★★★ SUPERIOR PRODUCTS

Dynatech® products provide superior performance and fit for a wide range of exhaust applications. One thing that you can always count on regardless of what Dynatech® product you buy is excellent fit, function and performance. We understand the value of offering no hassle, maintenance-free products to our customers.

# DRAG RACING

*We have taken out all the guess work when it comes to selecting the right header for your race car. Dynatech® Drag Racing Headers are purpose-built to fit your specific application.*

*TIG-welded flanges are accurate to +/- .003" and improve weld flow for increased durability.*

*360° Gusset supports increase durability for muffler applications.*

*All drag headers are Chrome or high-temperature, silver ceramic coated inside and out.*

*Jig located U-tabs for easy bolt on collector installation.*

# DRAG RACING

## 2<sup>STEP</sup> DRAGSTER **CHROME** HEADERS TWO-STEP VERSION

- Large radius, CNC mandrel bent, equal length primary tubes.
- Equal length for superior acceleration.
- 360° gusset supports increased durability.
- CNC laser-cut flanges for superior quality and accuracy.
- Broader performance range with a combination of two tube sizes.
- A great combination of low end Tq and high end Hp over a non-stepped header.

\*Pan E-vac/O2 Kit included with all Standard Collectors.  
785-10095

**1 YEAR LIMITED WARRANTY**  
**MADE IN THE U.S.A.**

## LONG TUBE BIG BLOCK CHEVY SIDE EXIT HEADER KIT

These Long Tube Big Block Chevy Header kits are designed with ease of assembly and performance in mind. The tubes are tack welded together to make it easy to completely assemble or make changes. Collectors are sold separately and come in a variety of sizes in standard or merge style configurations. Optional ceramic coating is available once you assemble your kit. After assembly, the 16 gauge steel construction and CNC laser-cut, surfaced flanges make this a durable header for multiple racing seasons.

- 0.375" thick CNC laser cut and surfaced flanges.
- Stepped tube sizes to optimize torque and horsepower.
- Designed to run out the side fender of a tube chassis door car with a BBC.
- 28.000" primaries.
- **Collectors sold separately (page 13).**

APPLICATION	TUBE SIZE	PART #	PRICE
SIDE EXIT HEADER KIT	2.250" - 2.375"	760-42410	\$499.99

## HEADERS SLIP-ON COLLECTORS

**1 YEAR LIMITED WARRANTY**  
**MADE IN THE U.S.A.**

**DRAGSTER, BIG BLOCK CHEVY, STRUT FRONT & DOOR SLAMMER**

- CNC laser cut flanges feature raised port location for increased power.
- Unique port gussets eliminate cracking caused by tire shake and muffler applications.
- Jig located U-tabs for hassle free, bolt-on collectors.
- Five models in straight or stepped header tubes.
- 28.000" equal length design.
- High-temp., silver ceramic coated inside and out. Ceramic coating comes with a three year limited warranty.

**Ceramic Coated**

\*Pan E-vac/O2 Kit included with all Standard Ceramic Collectors. (Collectors sold separately)

**\$799.99**

## WELD-UP HEADER KITS

### BIG BLOCK CHEVY STRUT FRONT AND DRAGSTER HEADERS

Designed specifically for strut type front end cars and dragsters, this kit allows you to fabricate your own headers to save money or make changes to the kit to fit your specific needs. These kits are assembled in the same jig we use for our finished headers. Then, we simply tack-weld all connections. If needed, you can cut a tack-weld to reposition the tube, or you can simply finish weld the kit and have the same header offered by Dynatech®.

- Same exact header as a Dynatech® finished header.
- Tack-welded to make it easy to change or finish weld.
- CNC laser-cut flanges, gaskets, gussets and bolts included.
- Optimum port exit angle for added power.
- **Collectors must be purchased separately (see below.)**
- **Star Plugs must be purchased separately (see page 13.)**

## DRAG RACING EXHAUST BIG BLOCK CHEVY STD. & TALL DECK "572"

**1 YEAR LIMITED WARRANTY**  
**MADE IN THE U.S.A.**

**'67 – '69 CAMARO**  
**'68 – '74 NOVA**

**▶ COATED**

- Designed for BBC tall deck motors.
- Mandrel bent 2.125" primary tubes.
- CNC laser-cut flanges feature optimum port location for increased power.
- Designed for stock engine location.
- Fits factory, manual, and power steering box.

\*Pan E-vac/O2 Kit included with all Standard Coated Collectors.

- High-temp., silver ceramic coated inside and out.
- Ceramic coated headers require separate purchase of collectors.
- 10.200" Deck height.

**\$159.99**

## MUSTANG K-MEMBER HEADERS '79 - '04 MUSTANGS

- For use with AJE, TEAMZ, and P.A. Racing K Members.
- Fits with factory starter, master cylinder, brake booster & proportioning valve (SBC, SBF, LSX only).
- Designed to be used with a wide variety of transmissions.
- '79-'93 requires after market steering shaft.
- May require a "cable style" shifter linkage.
- Not designed for use with motorplate.

**1 YEAR LIMITED WARRANTY**  
**MADE IN THE U.S.A.**

**LSX**

*\*Will work with 302 by spacing engine up 0.625" between engine block and motor mount.*

## MUFFLERS

### Auger Style Muffler

- 11.000" long – fits inside 3.000" or 3.500" O.D. pipe.
- Weighs only 1.000 lb.
- 6-7 dB reduction.

APPLICATION	SIZE	PART #	PRICE
AUGER STYLE MUFFLER	3.000"	776-24302	\$29.99
AUGER STYLE MUFFLER	3.500"	776-24352	\$29.99

## SPLIT-FLOW<sup>®</sup> RACING MUFFLERS

The Split-Flow<sup>®</sup> racing muffler is the "hot topic" among racers, and for good reason. The straight-thru design can handle big power. The exclusive dual pattern core reduces dB levels while maintaining a powerful sound. The all-aluminized, fully welded construction makes it a top choice for racing and high performance applications.

- Straight-thru design for maximum flow.
- Dual-pattern core for reduced sound levels.
- All-aluminized materials and welded construction.
- Stainless steel sound absorbing material for no burnout.
- Lightweight design.
- Meets or exceeds dB requirements at most muffler-required sanctioned events.

OVAL (14.000"L X 7.000"W X 4.500"H DIA.)	INLET I.D.	OUTLET I.D.	PART #	PRICE

## MERGE COLLECTORS

In order to understand how the merge collector works, you must first know why one exhaust system can generate more torque and horsepower than another. The ability of a header/exhaust system to maintain exhaust gas velocity has a tremendous impact on realizing maximum torque and horsepower. Any significant changes in the system, such as baffles (mufflers) or collectors, will have an impact on exhaust gas velocity. The large area change seen at the transition from the primary tube to the collector causes an immediate reduction in exhaust gas speed. This reduction in speed decreases the efficiency of the system, thereby reducing scavenging ability. Scavenging ability is the key factor by which an exhaust system is evaluated. The more efficient the system, the more air/fuel mixture that can be pulled into the combustion chamber. Obviously, the greater quantity of air/fuel mixture that can be burned, the more torque and power potential the engine has.

The construction of a merge collector is such that the change in area at the primary tube to collector transition point is minimized. This gradual transition allows the exhaust gas to maintain as much velocity as possible. Maintaining gas velocity is the key to allowing the exhaust system to reach its efficiency potential.

Merge collectors significantly improve the efficiency of the exhaust system. If your combination has been optimized to a header with standard collectors, it's possible to over-scavenge when adding merge collectors. Over-scavenging will normally decrease torque and horsepower when compared to your optimized, previous setup. We recommend dyno testing to arrive at the final camshaft combination when using this style of collector. If you need that last little edge and are willing to do the testing required to realize the potential gains, merge collectors are one of the most economical ways to gain significant amounts of torque and horsepower in the entire engine combination.

- 100% TIG-welded.
- Optimum reduction angle.
- Increases torque and horsepower.
- Sold Individually.

Note: Does not include O2 bungs. To purchase separately please order: **785-10097** (pg. 16).

### Mild Steel Merge Collectors

SLIP OVER	OUTLET	PART #	PRICE
2.250"	4.000"	<b>780-02518</b>	\$199.99
2.375"	4.500"	<b>780-03519</b>	\$199.99
2.500"	4.500"	<b>780-03510</b>	\$199.99

## INSERT CONES

### VORTEX® INSERT CONE

**NEW LOWER PRICING!**

- 100% T-304 stainless steel construction.
- Ultra-lightweight, less than .500 lbs. each.
- Little or no power loss.
- Easy bolt-in installation.

### HOW IT WORKS:

The Vortex® Insert Cone, installed near the exit of the header collector or muffler outlet, provides a large friction area to reflect and dissipate sound energy, thus reducing the dB level. The open area of the cone is actually greater than the area of the collector or exhaust pipe, thus reducing a back pressure condition. Because no significant back pressure has been introduced, the engine is still able to use the scavenge ability of a good header to create horsepower and torque. Dyno and track testing show significant noise reduction with little or no power loss.

TUBE SIZE	A	B	PART #	PRICE
3.000"	3.750"	1.000"	<b>772-32520</b>	\$69.99
3.500"	4.750"	1.000"	<b>772-32510</b>	\$69.99
4.000"	6.250"	1.000"	<b>772-32530</b>	\$69.99
4.500"	6.750"	1.000"	<b>772-32540</b>	\$69.99

Weighs less than 1/2 lbs. 1-3 dB reduction.

## TURN DOWNS WITH CONES

The Vortex® Turn Down is expanded to slip over collector outlets or tail pipes. Greater sound reduction can be achieved by directing the outlet away from the meter or sound test point. U-tab mounting hardware is included.

DESCRIPTION	TUBE SIZE	PART #	PRICE
TURN DOWN WITH 3.000" CONE INSTALLED	3.000"	<b>780-01100</b>	\$119.99
TURN DOWN WITH 3.500" CONE INSTALLED	3.500"	<b>780-01200</b>	\$119.99

CONES ARE SOLD INDIVIDUALLY, TWO REQUIRED PER V-8 ENGINE.

# FLANGES & GASKETS

## MUSCLE CAR APPLICATIONS

A great exhaust system starts at the beginning — the flange. One of Dynatech®'s biggest advantages is our wide selection of port matched flanges. All of our flanges are CNC laser cut for unparalleled quality and fit.

## CERAMIC COATING

All headers purchased with this option are coated inside and outside. The coating will significantly reduce the underhood temperature of your car — which translates into horsepower gain. **Headers purchased with this ceramic coating come with a 3 year warranty and a customer satisfaction guarantee.**

DESCRIPTION	PART#	PRICE
CERAMIC COATING FOR HEADERS	790-00100	\$299.99
CERAMIC COATING FOR X & Y PIPES	790-00101	\$74.99
CERAMIC COATING FOR ELBOWS	790-00102	\$49.99
CERAMIC COATING FOR COLLECTORS	790-00103	\$68.99

Note: Ceramic coating not available for Catalytic converters.

# ACCESSORIES

## CLAMP COLLAR KIT

These clamp collar kits allow you to connect extension pipes, Y-pipes, X-pipes, and mufflers without welding. The clamps also allow you to quickly disconnect if needed.

DESCRIPTION	TUBE SIZE	PART#	PRICE
CLAMP COLLAR KIT	2.500"	794-90250	\$29.99
CLAMP COLLAR KIT	3.000"	794-90200	\$29.99
CLAMP COLLAR KIT	3.500"	794-90350	\$29.99
CLAMP COLLAR KIT	4.000"	794-90400	\$29.99

## O2/PAN E-VAC KIT

Complete kit w/ weld-on bung.

- Increase horsepower.
- Better ring seal.
- Reduce crankcase pressure.

This kit has been dyno-proven to pull as much as 3 inches of vacuum on your typical bracket engine. The U-weld kit features an 18mm threaded bung that will also accept a standard O2 sensor found on EFI applications. Threaded adapter has standard .500" mpt for typical valve cover plumbing installation. 1-kit required per collector.

DESCRIPTION	PART#	PRICE
O2 SENSOR/PAN E-VAC COMPLETE KIT	785-10095	\$26.99
18MM WELD ON BUNG	785-10097	\$7.99
O2/E-VAC MALE ADAPTER	785-10096	\$11.99
18MM PLUG	785-10094	\$6.99
18MM SEALING WASHER	785-10093	\$6.99

## V-CLAMP KITS

Kit includes two weld-on v-clamp rings and stainless steel v-band clamp. Models for 2.500", 3.000", or 3.500" pipe sizes.

DESCRIPTION	PART#	PRICE
V-CLAMP COLLAR ASSEMBLY 2.500"	794-91225	\$49.99
V-CLAMP COLLAR ASSEMBLY 3.000"	794-91230	\$49.99
V-CLAMP COLLAR ASSEMBLY 3.500"	794-91235	\$59.99

Models for 2.500", 2.750" 3.000" or 3.500" pipe sizes. 1 clamp/pkg.

## EXHAUST TIPS

With their unique insert design, TQ Tips® allow for a flush fit with the outside diameter of your exhaust's tail pipe. This makes for a smooth, clean look that doesn't take away from your car's appearance like bulky, clamped-on tips tend to do. Another quality feature of these tips is the billet aluminum construction, giving them unmatched strength and function.

DESCRIPTION	PART#	PRICE
TQ TIP FOR 2.500" OUTLET (SINGLE TIP)	794-93025	\$34.99

BLOCK HUGGER HOT ROD HEADERS (Fits Straight Head Plugs Only)

PART#

PRICE

730-10010

\$399.99

Machined flange is flat ground for proper fit and leak-free performance.

Machined flange features unique bevel that adds a quality look.

High-flow contoured collector for increased power.

Finished welds offer smooth exhaust flow and excellent seal.

# HIGH PERFORMANCE

- Perfect, direct bolt-on fit.
- 0.375" Thick CNC laser-cut flanges.
- 4-Bolt ball & socket collector flanges.
- All flanges machine surfaced after welding.
- 3.000" Wide, 2-bolt band clamps.
- Optimized tube length for Hp and torque.
- 100% jig assembled and checked for an excellent fit.
- Triple layer stainless steel gaskets.
- T304 stainless steel construction.
- Detailed instructions & all hardware included.

## HOW TO PURCHASE YOUR DYNATECH® EXHAUST SYSTEM

### 1 HEADERS

The headers consist of a long tube set of headers with all of the required hardware included for the installation. The headers alone cannot be installed as a "Bolt In" to your factory catalytic converters and system.

### 2 INTERMEDIATE SECTION

The intermediate section consists of the required components to connect the headers to your factory or aftermarket "Cat-Back" exhaust system. In most cases, you have two choices when it comes to selecting your intermediate section. You can choose either the "Catted" or "Non Catted" version.

These products are intended for racing and off-road applications. Not legal for sale or use in the state of California, nor in states which have adopted California emission standards.

## LIMITED LIFETIME WARRANTY

of purchase is required for any / all warranty claims. Except for the limited lifetime warranty set forth herein, AFCO Performance Group, LLC makes no warranties either expressed or implied, written or oral, with regard to the products including, without limitation, any warranty of merchantability or fitness for a particular purpose. In no event shall AFCO Performance Group, LLC be liable for any special, incidental or consequential damages, or any other damages whatsoever arising out of or connected with the use or misuse of the products. Purchasers acknowledge and agree that no person, entity or agent of AFCO Performance Group, LLC has any authority to make any statement contrary to this disclaimer and that any warranty statements or representations allegedly made on behalf of AFCO Performance Group, LLC by any such person, entity or agent are void. AFCO Performance Group, LLC products are not D.O.T. approved and are intended for off-road use only. Purchasers are relying solely on their own skill and judgment to select, purchase and use suitable products and assume all responsibility and risk with regard thereto.

Catalytic Converters: Catalytic converters included with any SuperMAXX® system are limited to a 2 year limited replacement warranty. For any catalytic converter warranties, it is required that the product be returned to AFCO Performance Group, LLC for review. After inspection, a determination will be made as to what caused the failure. Any failure determined to be caused by an incorrect engine tune, or any other use for which the converter was not designed, will void the warranty. Any freight cost to get the product to AFCO Performance Group, LLC for evaluation will be the customer's responsibility.

# ACCESSORIES

## BALL & SOCKET KIT

Unlike common metal to metal connections, Dynatech®'s unique "4-Bolt, Ball and Socket" connection uses a 0.500" thick, tapered donut gasket, which allows for expansion and contraction while maintaining a long lasting leak free seal. We also use four bolts instead of two or three for added durability. For use with any 3.000" O.D. collector and 100% stainless steel.

DESCRIPTION	TUBE SIZE	PART#	PRICE
STUB KIT	2.500"	791-09025	\$129.99
STUB KIT	3.000"	791-09030	\$149.99

## STEPPED BAND CLAMPS

Smooth transition taper allows proper fit to seal expanded slip-fit connections. Great for muffler, tail pipe, and merge pipe connections.

DESCRIPTION	PART#	PRICE
BAND CLAMP FOR 2.500" JUNCTION	789-70250	\$34.99
BAND CLAMP FOR 2.750" JUNCTION	789-70275	\$34.99

# ACCESSORIES

## FLANGES & GASKETS

### HIGH PERFORMANCE APPLICATIONS

A great exhaust system starts at the beginning - the flange. One of Dynatech's biggest advantages is our wide selection of port matched flanges. All of our flanges are CNC laser cut for unparalleled quality and fit.

**Stainless Steel Flanges**

**Stainless Steel Gasket**

## LIMITED LIFETIME WARRANTY

the event the item cannot be repaired or replaced, a refund in the amount of the original purchase price may be issued. Proof of purchase is required for any / all warranty claims. Except for the limited lifetime warranty set forth herein, AFCO Performance Group, LLC makes no warranties either expressed or implied, written or oral, with regard to the products including, without limitation, any warranty of merchantability or fitness for a particular purpose. In no event shall AFCO Performance Group, LLC be liable for any special, incidental or consequential damages, or any other damages whatsoever arising out of or connected with the use or misuse of the products. Purchasers acknowledge and agree that no person, entity or agent of AFCO Performance Group, LLC has any authority to make any statement contrary to this disclaimer and that any warranty statements or representations allegedly made on behalf of AFCO Performance Group, LLC by any such person, entity or agent are void. AFCO Performance Group, LLC products are not D.O.T. approved and are intended for off-road use only. Purchasers are relying solely on their own skill and judgment to select, purchase and use suitable products and assume all responsibility and risk with regard thereto.

Catalytic Converters: Catalytic converters included with any SuperMAXX® system are limited to a 2 year limited replacement warranty. For any catalytic converter warranties, it is required that the product be returned to AFCO Performance Group, LLC for review. After inspection, a determination will be made as to what caused the failure. Any failure determined to be caused by an incorrect engine tune, or any other use for which the converter was not designed, will void the warranty. Any freight cost to get the product to AFCO Performance Group, LLC for evaluation will be the customer's responsibility.

Dynatech® SuperMAXX® Limited Lifetime Warranty: All Dynatech® SuperMAXX® exhaust systems come with a limited lifetime warranty. AFCO Performance Group, LLC will repair or replace any such products found after our inspection to be defective in workmanship or material, for the original purchasing customer, on the original installed vehicle. Any product that has been improperly installed, damaged, welded on or modified in any way will not be considered for warranty. In

These products are intended for racing and off-road applications. Not legal for sale or use in the state of California, nor in states which have adopted California emission standards.

# TRUCK / SUV

- Perfect, direct bolt-on fit.
- 0.375" Thick CNC laser-cut flanges.
- 3-Bolt ball-&-socket collector flanges.
- All flanges machine surfaced after welding.
- 3.000" Wide, 2-bolt band clamps.
- Optimized tube length for Hp and torque.
- 100% jig assembled and checked for an excellent fit.
- Triple layer stainless steel gaskets.
- T304 stainless steel construction.
- Detailed instructions & all hardware included.

## HOW TO PURCHASE YOUR DYNATECH® EXHAUST SYSTEM

### 1 HEADERS

### 2 INTERMEDIATE SECTION

The headers consist of a long tube set of headers with all of the required hardware included for the installation. The headers alone cannot be installed as a "Bolt In" to your factory catalytic converters and system.

The intermediate section consists of the required components to connect the headers to your factory or aftermarket "Cat-Back" exhaust system. In most cases, you have two choices when it comes to selecting your intermediate section. You can choose either the "Catted" or "Non Catted" version.

These products are intended for racing and off-road applications. Not legal for sale or use in the state of California, nor in states which have adopted California emission standards.

# OVAL TRACK

**604  
CRATE**

## 604 CRATE ENGINES:

*604 Crate Engines have a unique cylinder head port design that, unlike the 602 Crate engines, has a much higher port ceiling. This requires a special flange to obtain maximum exhaust flow. Dynatech® has responded to these demands by offering a flange specifically designed for the 604 Crate Engines. This flange is currently offered on a number of our headers. If you find an application in our catalog that does not offer this unique flange on the header, please contact us and request it. We are always looking for more ways to satisfy our customers.*

## ONE YEAR LIMITED WARRANTY

AFCO Performance Group, LLC will repair or replace any products found upon our inspection to be defective in workmanship or material within 12 months from date of purchase for the original purchaser. Except for the limited warranty set forth herein, AFCO Performance Group, LLC makes no warranties either expressed or implied, written or oral, with regard to the products including, without limitation, any warranty of merchantability or fitness for a particular purpose. In no event shall AFCO Performance Group, LLC be liable for any special, incidental or consequential damages, or any other damages whatsoever arising out of or connected with the use or misuse of the products. Purchasers acknowledge and agree that no person, entity or agent of AFCO Performance Group, LLC has any authority to make any statement contrary to this disclaimer and that any warranty statements or representations allegedly made on behalf of AFCO Performance Group, LLC by any such person, entity or agent are void. AFCO Performance Group, LLC products are not D.O.T. approved or intended for street use. Purchasers are relying solely on their own skill and judgment to select, purchase and use suitable products and assume all responsibility and risk with regard thereto.

## CRATE MODIFIED

## 2010-2014 SHAW CHASSIS

MADE IN THE U.S.A.

- Accommodates raising the engine 1.000".
  - High quality stainless steel for increased header life and exhaust velocity vs. mild steel.
  - Fully TIG-welded construction improves weld quality.
  - 9.000" long collector for IMCA rules.
  - Laser cut flanges w/ 604 crate port design.
  - Three inch collector outlet diameter.
  - Triple-step long tube design optimized on "in-house" engine dyno.
  - Gaskets and bolts included.
  - Accommodates raised & offset engine positions.
  - 1/2 sets are available for crash replacement.
  - Ceramic coating services are available.
- Call Dynatech® for details.
- 1 Year Limited Warranty.

## TORQUE BOOSTERS

The Dynatech® Torque Booster is a great way to pick up some low end torque on many engines. The gains are usually between 2500 and 4200 rpm, which is an excellent benefit for restarts. This device is a simple way to quickly add that well needed torque on the low end without sacrificing any power on the top end.

- Easy install.
- Excellent add-on for crate engines.
- Increased torque on restarts.
- Promotes torque gains of 10% or more.

APPLICATION	INLET SIZE	OUTLET SIZE	PART #	PRICE
TORQUE BOOSTER (602 & 604 CRATE)	3.000"	3.000"	<b>772-06312</b>	\$99.99
