**Spring Compressor**

Safely compress your tall 3" and 5" springs so that you can install the spring without moving the coil over adjustment nut. With the nuts locked in on one plate, simply use an impact on the other end of the compressor to compress the spring and install your shock.

WM180 Spring Compressor \$125.00

**Heim Center Finders**

These unique heim center finders are designed to allow the racer to set up spare arms once the car is set up. This is done simply by removing the arm, bolting the tape measure center finder into one end and placing the center pointer on the other and measuring. When you establish a measurement place the finder set into the spare and adjust to match the length of the original. The tape end center finder needs to be bolted in, otherwise the force will pull it out of the heim. When the tape end is bolted in, snug it, hook it, and pull it to let the finder square itself. Then just tighten, and you are ready to go. We designed this product to take the work out of eyeing up bolts in a critical situation when an identical spare is crucial. Finder sets are available for 1/2", 5/8", and 3/4" heims.

WM28500 1/2" heim \$21.00 / pair  
 WM28625 5/8" heim \$24.75 / pair  
 WM28750 3/4" heim \$27.25 / pair

**Steering Arm Puller**

If you ever find yourself with some front end carnage, and need to make a quick steering repair at the track, there is no longer a need to start swinging a hammer down by your radiator and pounding on your center link. This tool slides in between your tie rod end and the center link. Then simply screw the bolt in, and it pushes the tie rod end out of the center link in no time at all.

WM329 STEERING ARM PULLER \$40.00

**Penske Sweep Tool**

This tool is for adjusting the sweeps on your shock shaft. Screw on cover design so that you can put it in your pocket without poking your rocket.

**Fuel Barrel Socket**

After 23 years of using a channel lock to open our barrels of fuel we finally made a trick billet socket! The socket uses a 1" wrench and is a cool tool.

**WM233 Fuel Barrel Socket \$29.00**

**Engine & Rear End Lift Handles**

Our redesigned machined aluminum sure-grip engine lift handles now double as rear end lift handles as well. This multi tool allows you to simply screw one end into the engine, or flip it over and screw the other end into the studs on your hub. A great two in one tool. Sold in sets of four.

**WM50 Lift Handles \$42.00**

**Set-Up Plate**

The ultimate setup plate for tow and bump steer. Plate is 12" x 23-1/2" and is 3/4" thick machined billet aluminum. This plate will allow you to get the proper bump travel when setting bump steer and will not flex like the 1/8" thick plates. These plates also work great for checking your rear end at the track to see if it is bent. We make them to fit the Wide 5 and 5 x 5" bolt patterns.

**WM316-5x5 Setup Plate for 5 x 5" Pattern \$150.00 each**  
**WM316-W5 Setup Plate for Wide 5 Pattern \$150.00 each**

**Coil Over Tool**

This tool is used to adjust your coil over nut when using 5" spring adapters. It has a long replaceable rod for an easier fit.

**WM192 Coil Over Tool \$15.00**

Bolts small Denso Alternator to SB Chevy at the water pump or the lower LS of the block. Comes with bolt and spacer kit.

**WM176 \$80.00**

**Instant Timing Knob**

This instant timing knob is truly revolutionary! The knob allows you to change your timing without having to loosen and re-tighten the distributor hold-down clamp. It is great for quick pit stop tuning. Plus, your crew chief will be able to avoid those nasty hand burns that happen while rotating a distributor on a hot racing engine. How does it work? The instant timing knob protrudes from the side of the distributor. When you need to advance or retard the timing, simply turn the knob (1/2 revolution equals 1 degree of timing, a full revolution equals 2 degrees of timing). It's so accurate that no timing light is needed to verify it!

**WM46 Instant Timing Knob \$60.00**

**Radiator Restrictors**

The restrictor goes in the lower radiator hose replacing the thermostat restrictor to keep the water in the radiator longer. Therefore, the water is cooler when it reaches the engine. Machined aluminum available for the aluminum racing radiators or stock radiators.

**WM9 Radiator Restrictor \$17.50**

**Intake Divider**

Designed to help the flow of your cooling system. The divider protrudes into the intake to separate water flow from side to side. So there is less interference and back pressure. Works well with Wehrs Radiator restrictors. Will fit cast iron or aluminum intakes.

**WM74 Intake Divider \$15.50**

**Thermostat Riser with Ports**

Used when running the remote lines to the rear of the intake to prevent vapor pockets. The riser thickness is 1" and comes with either 1/4" or 3/8" NPT threads.

**WM39250 1/4" Thread \$20.00**  
**WM39375 3/8" Thread \$20.00**

**Thermostat Riser with Ports and Intake Divider**

We took our thermostat riser and our intake divider and made a trick little combo package. It's lighter, shorter, uses 1 less gasket, and costs you less money than running both together.

**WM39250D THERMOSTAT RISER 1/4" PORTS & INTAKE DIVIDER \$28.00**  
**WM39375D THERMOSTAT RISER 3/8" PORTS & INTAKE DIVIDER \$28.00**

### Universal Steering Mounts

Driver comfort with ease in any car. The hinge design allows for maximum adjustability. No more Heim binding. With the many dash bar heights and cockpit lengths, it's hard to please everyone, but we think this should do it. Standard non collapsible mounts also have built-in steering alignment so when you set your toe or put the wheel on to go, you know the wheels are straight. Available in three lengths: 6 - 3/4", 9 - 1/2", 16" and 1 - 1/2", or 1 - 3/4" dash bars. Part numbers with a C are for the 1-1/2" tube style collapsible columns and the part numbers with C750 on the end are for the collapsible style with the 3/4"-16 thread heim style.

**Steel Bearing Suspension Cages**

Our steel suspension cages have a split plate design that allows you to change plates if you need to without removing the hub, brake, and cage. Standard cage comes with 4", 5", 6", and 7" shock drops. The 4 bar rods have 5 holes on the top and bottom to change indexing, with a 9" standard bar spacing. Our cage designs are second to none with options to fit any car or suspension design with bearing or bronze options in both single and double shear plate design. The Combo Cages allow you to clamp the brake caliper to the cage or use it as a brake floater in one package which give you a tuning option available by no other company. Our Combo Cages now can be built with the Triple Brake Option to also allow you to clamp the brake to the axle tube. Cages come complete with clamp rings and all hardware. Shock mount options to choose from are straight stud, or a bind free swivel mount and are sold separately.

Our cages now use our Quick Adjust technology that allows you to make a bar change without removing the bolt. To make a 4 bar change you loosen the bolt until the shouldered spacer is free, adjust up or down, reinsert the spacer, and tighten in the new position. All of our cage plates are now laser engraved for easy reference so you know where your 4 bars are at, and all the part numbers are on the parts for easy replacement reference.

**Adjuster Wrench For Slider**

WM252 ADJUSTER SLIDER WRENCH \$30.00

WM251-15

Clean and grease your sliders every 10 races.

**Dual Bearing Spring Slider**

Lots of trickery in our dual bearing spring slider. We use a linear ball shaft bearing instead of bronze bushing along with a shaft stabilizing internal piston for the smoothest and most stable slider on the market. The spring cup opposite the adjusting nut is quickly removed with a clip, so you don't have to unscrew the nut to remove the spring. Also a four position locking mechanism and now a fine thread body for fine tuning. We put a Torrington bearing on the adjuster nut so you can adjust it easily and so the spring works freely throughout its travel. The length is 21" on (WM251-0), 24" on (WM251) and 26" on (WM251-2) extended. Sliders are available for 5" OD springs and 2-1/2" ID coil over springs.

**Adjustable Single and Dual Stage Lift Arm Bump Stop Cups**

Our dual stage lift arm bump cups allow you to have a soft stage in your bump stop package that locks out and then goes to the stiffer bump stop. Having 2 cups with different rates allows for the ultimate tuning ability. The bottom cup has an adjustable sleeve that you can adjust the amount of travel before the top cup hits the bottom cup and transfers to the harder bump stop. Sold separately so you can choose single or dual stage and your shock shaft size.

**5th & 6th Coil Combo Mount**

Our combo mount replaces having to slide a single clamp mount, or having multiple clamp mounts, when making changes to the location of your 5th coil. It also allows you to be assured of proper alignment of the top mounts when using our lift arms, as the holes in this mount line up with the holes in our newly designed lift arm.

WM336	5TH & 6TH COIL COMBO MOUNT 1-1/2" ROUND	\$175.00
WM336S	5TH & 6TH COIL COMBO MOUNT 1-1/2" SQUARE	\$175.00

**Dirt Late Model Lift Arm**

We've taken the lift arm to the next level with this two piece billet beauty. With a monoball bearing on the bottom arm, the top arm has a standard heim with a double adjuster to make adjusting pinion angle a breeze. We have two lengths available, a short version and a long version with 5th coil mounts on the long at 35", 37", 39", and 41" and on the short at 29", 31", 33" and 35" from the center of the axle tube. The 6th coil mount is 2" forward of farthest 5th coil mount. Bar comes complete with all rear end brackets and hardware to mount to your hot rod. Rear end brackets now have 2 sets of holes for a high and low pinion mount option in one bar.

WM315DS	Short Lift Arm Complete with all hardware	\$375.00
WM315DL	Long Lift Arm Complete with all hardware	\$375.00

**MARTY ELSEN**

*Aug 24, 1970 - Sept 24, 2016*

On August 24, 2016 we lost our production facilitator, Marty Elsen. Even though many of you never met him, he was a vital part of our team. Marty was a great friend/employee to us and will be missed forever!

Watch for our Trackside Factory Support Trailer coming to a track near you.
